

David Ellis - Senior Consultant - BEng

David studied electrical engineering at Sheffield Polytechnic and worked extensively in the steel industry. He worked as quality manager for NEI before moving into consultancy 17 years ago, initially specializing in ISO 9000 and SPC (Statistical Process Control). He now delivers in two key areas- lean manufacturing and supervisory development. David's style is very people focused and consistently achieves outstanding results with shop floor level teams or one-to-one coaching.

David has a down to earth practical approach that works well with traditional engineering industries and also civil engineering, food, local government, medical and service industries.
