

Phil Topley - Senior Consultant - BEng

Phil graduated in Mechanical Engineering from Sheffield University and has worked in Operations for the last 35 years. His career started in the steel industry (forges and foundries), before moving into garment manufacture and to engineering fabrications.

About 15 years ago while running an automotive plant and as a supplier to Toyota in the UK, he learned Toyota Production System methods that he now delivers in LEAN Manufacturing courses and Business Improvement Techniques.

Phil is very people focused and drives change through diverse groups while influencing and communicating at all levels to ensure that the change initiatives are supported throughout the business.

He has applied these improvement techniques in printing and distribution, logistics, education, automotive and engineering, as well as a particular understanding of the customer demands in the retail sector'
