

Trevor Wing - Senior Consultant - Pg. Dip Manufacturing Management

With over 35yrs manufacturing experience and a varied career in an industrial environment, Trevor has an in-depth knowledge of operations management and performance improvement. His experience spans from a formal engineering apprenticeship where he obtained a HNC in mechanical engineering, through to senior management responsibilities. Trevor was involved in a number of performance improvement initiatives within the aerospace industry, giving him expansive experience of process improvement, performance measurement, communications and team working. He studied lean manufacturing techniques at Coventry University and obtained his post-graduate diploma in manufacturing management (merit) in 2000. Trevor has worked with a wide range of industries including construction, distribution and logistics.
